

I confirmed that the attached temporal evolutions of β_p and I_i matched those in Urano-san's FED 2015 and my PFR2013-2014 papers

Fig. 13 in FED2015 by Urano-san

“betap_and_li_in_FED2015_by_Urano.dat”

=> They are used as additional non-manipulable inputs

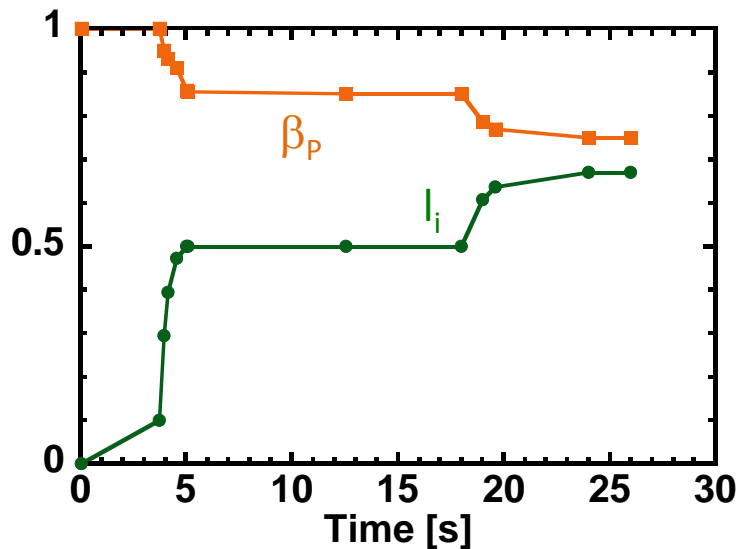

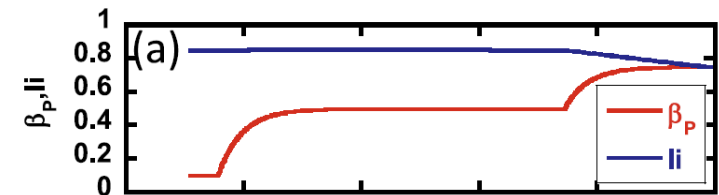

Fig. 3 in PFR2013 by Miyata

*I have used same temporal evolutions of β_p and I_i in PFR2013 and PFR2014.

“betap_and_li_in_PFR2013-2014_by_Miyata.dat”

=> They are used as additional non-manipulable inputs
